**Im July konnte Daniel Grant bereits sein neues Unit Parktech Signature Series Feature am Hannams Wake Hub testen. Wie schreiben die Jungs „Thanks to Ben, Terry, and everyone at Hannam's, we had the best time. Riding and filming with his friends, Daniel stacked a lot of great footage not only of himself but also with his good friend James Harrington so he insisted we put him in the video. With 4 days of riding and filming, we formulated this video to showcase Daniel doing his thing on his feature.“**

Und Begeisterung ist auch in den Worten Daniels zu hören „I love my UNIT Parktech Signature Feature, it turned out perfectly. This feature just opens up so many tricks for wakeskating and wakeboarding with the perfect transition. I highly recommend putting a kicker in front for more options and bigger transfers. I know people are going to do different crazy tricks than me and that'll be really cool to see. When I saw kids really hitting the incline to the transition and dropping big 270s off the top it showed me that it's good to hit for everyone and it has that easy option to it.

I hope with my UNIT signature series feature we can bring big transition riding across the globe to everyone.“

**Daher wollen wir Euch „sein“ Feature nicht vorenthalten. Wer einmal die Gelegenheit hat, ein solch fettes Obstacle zu shreden, wird es sicher nicht so schnell vergessen. Viel Spaß und keep on riding!**
