***Xcel* präsentiert die neue Innenkaschierung *TDC* „Thermo Dry Celliant". *TDC* ist die erste die klinisch getestete Innenkaschierung auf dem Markt und exklusiv in den *Xcel* Anzügen verbaut worden.**
Das *TDC* Material arbeitet in Symbiose mit dem Körper ab dem Moment des Anziehens und steigert dadurch die körpereigene Leistungsfähigkeit.

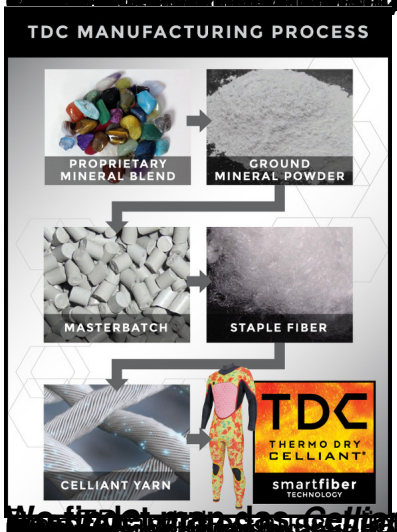

„Xcel has been a product driven brand since we hand-made our first wetsuit in 1982. TDC represents a huge leap forward in our continued commitment to designing wetsuits as complete systems that use proven technologies to deliver real-world benefits." – Lance Varon, *Xcel* Design Director.

INTRODUCING
TDC
THERMO DRY
CELLIANT
smartfiber
TECHNOLOGY
AN XCEL EXCLUSIVE
COMING FALL 2014
WETSUITS WILL NEVER BE THE SAME

XCEL'S WARMEST
WETSUIT LINING EVER
TDC
THERMO DRY
CELLIANT
smartfiber
TECHNOLOGY
COLDER
WARMER
VERSUS OTHER WETSUIT LININGS:
Standard Nylon
Hollow Fiber with
Quick Dry

HOW TDC WORKS
CELLIANT YARN: FIBER CROSS SECTION
TDC
MINERAL ENHANCED
SMART FIBERS
INFRARED
ENERGY
SKIN
MUSCLE
BODY
HEAT
BODY HEAT IS RECYCLED INTO
INFRARED ENERGY & DIRECTED BACK INTO
SKIN & MUSCLE, INCREASING TISSUE OXYGEN
LEVELS AND IMPROVING CIRCULATION
FOR GREATER WARMTH, INCREASED
ENDURANCE, & FASTER RECOVERY
